

Research associate profile: Prof Brett Hurley

01/08/2023

Research associate profile

Prof Hurley provides an important link for the ICFR with FABI and its students. He contributes to collaborative research projects and outputs with the ICFR, including co-authoring of scientific papers. He is an associate professor at University of Pretoria's Forestry Agricultural Biotechnology Institute (FABI) and a research leader in the internationally recognised Tree Protection Cooperative Programme (TCP) and the DST Centre of Excellence in Tree Health Biotechnology (CTHB), both based at FABI.
